Several varieties of Potatoes, Tomatoes,
Peppers, Squash, Strawberries

MEET THE GROWERS

Green Field Farms

About 90 percent of our Amish families made a living from their farms in the 1980s. Today, less than 10 percent are full-time farmers having been replaced by highly mechanized agriculture. Green Field Farms was established in January 2003 to revitalize our family farms by providing customers like you fresh and healthy food. Raising organic animals and crops are not new ideas its the way we have farmed for centuries.

Green Field Farms believes in one simple rule: Grow food the way our family farms have done for hundreds of years. Fruits &

vegetables sprout from fields that are shaped by our horse drawn plows. The soil is cared by the touch of our hands and revitalized naturally. As a community of Amish farmers, we believe its important to offer only healthy and nourishing products that our own families enjoy everyday, too. Our certified organic and specialty products are naturally raised. And they're produced by our families who want to farm for generations to come.

Mission:

To oversee the development of a profitable market for agricultural products produced in our Plain communities and the building of a local economy to support and enable the Plain community to thrive.
